

Confetti maxtris[®]

CATALOGO EXPORT 2022

AZIENDA /COMPANY

*Confetti
maxtris*

For over a century the Italiana Confetti Srl strives to combine tradition and innovation, offering to the market a quality candy, made according to old craftsmanship and the most modern production technologies.

The love for the "arte confettiera" and the continuous search for improvement have enabled the company to achieve important goals promoting growth and development.

For almost a century serving our customers

With Dario and Nicola Prisco's guidance, the Italiana Confetti Srl has successfully made its name as one of the leading Italian confectionery industry, developing a daily production capacity of about 20.000 kg of confetti in the many different tastes and colours, specified in production.

During 2014 important investments were begun both for the expansion of the plant of approximately 3,000 m² covered (in addition to the existing 2,500 m²), and for the purchase of machineries of the last generation, projected and realized according to our needs. In the 2017 we added to our plant a new warehouse completely dedicated to the logistic service. Our company has been investing much in the field of communications and marketing with the continuous restyling of the packaging and choosing as brand testimonial Enzo Miccio, the most famous wedding planner in Italy.

Nicola and Dario Prisco, factory's owners. In the third picture, Dario Prisco and Enzo Miccio, a famous Italian wedding planner and television character, during a visit to the factory.

ECO FRIENDLY

The factory in Scisciano

A COMPANY TOTALLY ECO

Italiana Confetti has been always paying great attention to the problem of the respect of the environment and to the questions of its safeguard.

The environmental sustainability is a primary value for us, we have translated it in a concrete commitment. It has been always respected in all our activities of planning, production and logistics. It's important the total respect for our customers and for ourselves.

MANUFACTURING PROCESSES

The company has always had the goal to grow by focusing on the standardization of production processes with the help of technologically advanced machinery capable of ensuring compliance with the set quality standard.

Chocolate items are produced and stored in places with controlled temperature to ensure the product's stability and integrity in any season of the year.

To be completely independent, we invested much in the purchasing of a technologically advanced machinery, who prints the chocolate souls in different shapes (almond shape, heart, small heart, lens and small lens).

Inside the factory in Scisciano

LABORATORY AND QUALITY CONTROL

Our company pays particular attention to the conformity of raw materials and finished products.

Therefore, inside we have a section dedicated to the Quality Control, made up by three people, each one with different tasks and specific responsibilities, who daily work to satisfy our Customers' needs.

We have a laboratory inside, equipped to carry out the necessary verifications of hygienic-sanitary conformity of raw materials and finished products.

In addition to the internal laboratory, which is useful for preliminary and procedural checks, Italiana Confetti Srl uses external accredited laboratories to check the parameters of controls of food safety and hygiene of the process prescribed by the regulations for the sector. This organization provides every day over 100 quality checks on raw materials and finished products! The commitment of the Management and Quality Control Office has over the years rewarded the investment through the reduction of non-compliance and complaints by customers. In addition, the Company is currently certified BRC and IFS, being conform to the international standards for food safety.

STANDARDS

Italiana Confetti Srl, aware of the importance and the need to demonstrate and document its customers the ability to provide continuity with products that comply with the specifications and to meet their expectations, we thought it was necessary to implement a Management System for Quality and Food Safety in accordance with the requirements contained in the UNI EN ISO 9001:2008 and UNI EN ISO 22000:2005.

For Italiana Confetti making quality is first of all ensuring the food safety of their products. In fact, the last company's goal was to be found conform, in a short time, structurally and culturally to the most complex international standards imposed by the BRC / IFS.

The achievement of these purposes has been possible thanks to the creation of a new plant in which innovation and guarantees for food safety are the masters. To us it is important the selection of suppliers of raw materials that respect internal standards.

Finally, the continuous education and training of the staff must be considered as an other commitment and guarantees of quality that Italiana Confetti gives to its customers.
